### Dual 0-10VDC-to-Casambi 2-Channel Dimmer with Dig3 with Casambi CBM003 Long Range Radio

#### Product Description

10cas is a Bluetooth controllable, Casambi enabled, two channel analog 0-10VDC input dimmer that allows connection to a standard 0-10VDC analog dimming master controller to a Casambi network. While the Casambi manufactured CBU-A2D is intended to connect to analog controlled fixtures, the 10cas is the "other side", allowing for standard 0-10VDC controllers to be utilized with Casambi networks. The 10cas is connected between a 12-24 VDC Class 2 power supply, and a 0-10VDC master with one or two channels. In addition a single digital, dry contact is supported.

10cas can implement up to three Casambi pushbutton devices, making it an ideal partner for tunable white (TW) applications. Multiple 10cas devices can be used in the same network to control different fixtures, channels or zones since the two channels of control can be mapped using the Casambi mobile application. Two channels are 0-100% dimming capable, with a single digital ON/OFF from Dig3.

10cas can be configured with the Casambi app which can be downloaded free of charge from Apple App Store and Google Play Store. Different Casambi enabled products can be used from a simple single luminaire direct control to a complete and full featured light control system where many units automatically form an intelligent mesh network.

Compatible devices:

iPhone 4S or later  
iPad 3 or later  
iPod Touch 5th gen or later

Android 4.4 or later devices  
produced after 2013 with full  
BT 4.0 support

#### Technical Data

##### Input

Voltage range: 12-24 VDC, Class 2  
No-load input current: 30 mA

##### 0-10VDC Input (A and B)

2-wire analog 0-10VDC, two channels  
1mA source current, input must sink for control  
Top and bottom "trim" and hysteresis user program-  
mable

##### Digital Input 3

Open connection to Dig3 is considered OFF to  
Casambi, short Dig3 to RETURN to create an ON  
state. This input should not be powered, and only  
used as a dry contact between the two connections.

##### Radio transceiver

Casambi CBM003B Radio Module  
Operating frequencies: 2.401-2.483 Ghz  
Maximum output power: typ. +8 dBm  
-103 dBm RX sensitivity in long-range mode

##### Operating conditions

Ambient temperature, ta: -13...+113°F (-25...+45°C)  
Max. case temperature, tc: +167°F (+75°C)  
Storage temperature: -13...+167°F (-25...+75°C)  
Max. relative humidity: 0...80%, non-cond.

##### Connectors

Wire range, solid & stranded: 0.5 - 1.5 mm²  
14 - 22 AWG

#### Typical Connection Diagram

#### Mechanical Data

Dimensions are in mm.

\* Tc point is on bottom side

Dimensions: 2.2 x 1.2 x 0.7 inch  
72.6 x 30.0 x 18.0 mm  
Weight: 0.8 oz (23 g)

#### Certifications

FCC ID: 2ALA3-CBM002A  
IC: 22496-CBM002A

Conforms to UL STD 916  
Certified to CSA STD C22.2#205

Mesa, AZ 85207

**\*\*RATED FOR INDOOR USE ONLY\*\***

## Installation

Connect a Class 2 power supply with 12-24 VDC output voltage to the input connector of 10cas. Make sure not to use a constant current LED driver and make sure that the cable polarity is correct. The product has two 0-10VDC analog positive input connections, plus one common (RETURN) ground. Connect the 0-10VDC load wires to a 0-10VDC master of your choice to give you 0-10VDC control of your Casambi lighting network.

10cas can be mapped just like **Pushbuttons** are mapped in the Casambi application. Once you add the 10cas to your Casambi network, navigate to the “More” button at the bottom of the app. Then press “Switches; where the 10cas will be seen. Press on the 10cas that you want to configure, and select each of the two pushbutton items in turn. Then configure each of the two pushbuttons to control a Casambi element by pressing on “Not in Use” .and then select what the pushbutton is to control, most likely “Controls and Element”, which then you can select a certain element to control. Note at the bottom of this screen there are six user programmable parameters—High and Low Trim, and Hysteresis for each channel. These allow fine tuning of the bottom and top analog voltage in, and hysteresis allows for managing inputs that may be noisy. Be sure to press “Done” at the top right to save the configuration. The 3rd input is digital only, no dimming. Open wire is off, short Dlg3 to RETURN for an on state.

10cas should not be placed in a metal enclosure, such as metal junction boxes. Metal will attenuate radio signals which are crucial to the operation of the product. If the product will have to be installed into a junction box, make sure to use a plastic junction box. 10cas is an ETL Listed Open-Type device which means that it will have to be used together with a Class 2 power supply with maximum output power of 100 VA. The product can be installed outside of junction box. Make sure to comply with National Electric Code in installation and when selecting installation wires.

## Range

The range between two 10cas’s or between a 10cas and a smart phone can vary depending on obstacles and surrounding material. In open air the range between two 10cas can be in excess of 200 ft, but if the unit is encapsulated into a metal structure, the range can be only few feet. Therefore, thorough testing is highly suggested. Casambi uses mesh network technology so each 10cas acts also as a repeater. When testing the network, it is important to test that each unit can be controlled from any point of the network covered area.

## Compliance Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

## Warning

Changes or modifications not expressly approved by DMX Engineering and Design LLC could void the user’s authority to operate the equipment.

## FCC Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

## Radiation Exposure Statement for Canada

This device complies with Industry Canada’s licence-exempt RSSs. Operation is subject to the following two conditions:

- (1) This device may not cause interference
- (2) This device must accept any interference, including interference that may cause undesired operation of the device.

This equipment is exempt from the routine RF exposure evaluation requirements of RSS-102. This equipment should be installed and operated with a minimum distance of 20 cm between the antenna and the user or bystanders.

Le présent appareil est conforme aux CNR d’Industrie Canada applicables aux appareils radio exempts de licence. L’exploitation est autorisée aux deux conditions suivantes:

- (1) l’appareil ne doit pas produire de brouillage;
- (2) l’utilisateur de l’appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d’en compromettre le fonctionnement.

Ce matériel n’est pas sujet à l’évaluation habituelle d’exposition RF selon RSS102. Ce matériel devrait être installé et exploité en gardant une distance minimale de 20 cm entre l’antenne et l’utilisateur ou les spectateurs.
